RIMMER BROS

HELPING YOU CARE FOR YOUR DOLOMITE

Re-launched in 1972, the Triumph Dolomite was a company best-seller for the next eight years. Although all Dolomites were four-door saloons, based on the same Michelotti style, this was not a simple story, as there were four different engines, several different transmissions and several trim levels.

Not only that, but the Dolomites were closely related to earlier models, not only the Toledo and 1500TC types but also (as original ancestors) the front-wheel-drive 1300/1300TC/1500 models too.

To keep it simple, this catalogue only covers 'Dolomite' badged cars, of which more than 177,000 were originally built. Although it was the 16-valve Sprint which attracted most of the glamour, cars of all types have survived in large numbers. Sourcing parts and rebuilding expertise for all these cars has been one of the biggest challenges ever faced by Rimmer Brothers, and our stocks are always increasing.

Whether you have a 58bhp 1300, or a 127bhp Sprint, with this updated Catalogue we aim to help keep your job, of maintaining the Dolomite, as straightforward as possible. Not only do we offer an unbeatable stock of parts, but expertise, affordable prices, swift and efficient service.

THIS CATALOGUE

We have listed parts most frequently called for, but it is by no means exhaustive. Our stock lines are continually increasing therefore, if the part(s) you require are not listed, please contact our sales office where our staff will be please to check availability and price for you.

The catalogue covers all the 4-door range of Dolomites, including Sprint & 1850 from 1972 and all other Dolomites from 1976 on.

It does not specifically cover the Toledo or Triumph 1300/1500 FWD, RWD or TC variants although many components are interchangeable. There is a section at the back of the catalogue listing items that we currently have in stock for these models.

MEMBERS OF BRITISH MOTOR HERITAGE

British Motor Heritage is an organisation committed to the preservation of the cars which have special places in our motoring history. One of the ways in which it pursues this objective is by helping to ensure that replacement parts are available and are of sufficient quality. Stringent standards are necessary to meet the requirements of Heritage approval, and the highest accolade for any company involved with the supply of parts for classic cars is to have Heritage approval.

Rimmer Bros were invited to Heritage membership in 1987 and are approved for Triumph and Rover SD1 models.

THE CARS WE SPECIALISE IN

As well as supplying parts for your Dolomite, we also concentrate on TR2/3/4/4A, TR5/250, TR6, TR7/8, Stag, Spitfire, GT6, 2000/2500/2.5Pi, Herald, Vitesse, Rover SD1, Range Rover, Discovery, Freelander, 90/110 and Land Rover 'Series' vehicles. Please refer to inside rear cover for details on all our catalogues.

UK · WORLDWIDE · THE

SO WHERE DO WE GET OUR PARTS

Wherever possible we supply original stock from BL/Rover sources - lots of parts are still manufactured. Where this fails, we sometimes have parts re-manufactured. We have Heritage approval to do this, because we have satisfied them as to our quality control standards, and we use original tooling and factory drawings where these are available. Where original parts are unavailable and the cost of re-manufacture is prohibitive, we may supply a suitable alternative or in certain cases offer a used (non safety critical) part.

THE STOCK WE NEED TO GIVE THE SERVICE YOU NEED

Our degree of specialisation means two things. Firstly, our people know the cars we're dealing with inside and out, and can give you any advice you might need regarding part selection.

Secondly, we are able to stock in depth just about any part you might need. Triumph House is our latest HQ, acquired in 1991. With nearly 50,000 square feet of warehousing alone, it is a cavernous building, and it needs to be! It currently contains more than 350,000 recorded part numbers with over 25,000 stock lines, and we hold as many of each as necessary to make it almost impossible to run out of stock.

All other aspects of our operation receive equal emphasis. A truly efficient mail order and stock control system. The latest racking and storage facilities for fast and accurate "order picking". Careful packaging and despatch procedures.

THE PEOPLE YOU'RE DEALING WITH

This company really is owned by two brothers named Rimmer. Bill and Graham started their business from humble beginnings in the early 1980s, and it has grown to be one of the leading organisations of its kind in the world, supplying parts Worldwide to an ever growing list of customers.

Both Bill and Graham still work full-time in the business, helped now by over 50 members of staff.

The main qualification of membership of our staff is a recognition that our customers, and our company reputation, depend on our ability to get every aspect of our service right first time.

RIMMER BROS

COMMITMENT TO CUSTOMER SERVICE

Helpful - Accurate - Fast - Efficient

The overall objective at Rimmer Bros is to achieve customer satisfaction at all times.

Our people know your car well, and every member of our staff is dedicated in helping to preserve Classic Cars.

Our computer system gives up-to-the minute information regarding availability and the price of any item. We have an enviable reputation for despatching goods when the customer needs it, quickly and efficiently.

We try to make all our systems and documentation easy to follow and use, and make sure that our catalogues and price guides really do help our customers choose the right parts easily, first time.

TRADE MARKS & LOGOS: The 'Triumph' and 'Heritage' logos used herein are registered Trade Marks of British Motor Heritage Ltd, and are used with their license under the special 'Heritage' approval scheme.

**THIS CATALOGUE & OUR PRICE GUIDE**

There are no prices in this catalogue. Use it to select the parts you need, then check their cost by referring to the separate Price Guide which represents the other half of our ordering system. The price guide is updated and reprinted more frequently, but we ask that you confirm all prices when ordering. It may also list additional parts (new lines) that we have introduced since this catalogue was printed, and it has more detailed information about ordering & delivery methods. It also has information on warranties and a 'Trouble Shooter Guide'.

ORDERING BY PHONE

Please quote your home postcode and part numbers where possible. This gives instant access to our computerised records and stock control system. If you have any difficulty in selecting the parts you need, our expert staff can help.

UK Payment for Phone Orders
(See also "Overseas Orders & Payment.")

When you have checked on price, availability and delivery costs you can place your order by phone using Visa, MasterCard, Delta/Connect, Switch, Solo, American Express, Diners Club, or JCB. You will merely need to tell us the card number, expiry date (or issue number), cardholder's full name and registered card address.

After Hours Ordering Service

We operate a 24-hour answering/ordering service which is available to card holders out of normal hours for both UK and Overseas customers. Just leave all necessary details on our telephone voice mails, ie your vehicle type, year, model, the parts and/or the part numbers you require, plus your name, address (inc. postcode), credit card details and delivery address (if different).

Writing out these details before phoning usually helps a caller to give us clear instructions. If at all possible, please also leave a daytime telephone number.

ORDER BY PHONE

USE YOUR CARD.....

UK SALES: 01522 568000
EXPORT SALES: +44 1522 568000

ORDERING BY POST

Triumph House, Sleaford Road, Bracebridge Heath, Lincoln, LN4 2NA, England.

We ask you to phone first if at all possible - to check your parts selection, and to advise of delivery charges. Because prices and availability sometimes change, we can also confirm the exact remittance needed avoiding unnecessary delays. If you have not been able to telephone, please give us all possible information - car type/year, RH or LH, front/rear etc - so we can check your selection (including your name, address and postcode) in all correspondence.

Use our Order Form if you can. It asks specifically for all the details we might need. Please photostat or request additional copies of the order form if required.

UK Payment for Post Orders *(See also "Overseas Orders & Payment.")*

Send your remittance with the order. The 'Pricing' section in the Price Guide tells you how to calculate the amount.

We accept payment by personal cheque even if the cheque guarantee card limit is exceeded. All we require is your full name and address on the back of the cheque along with your cheque card number and for business cheques, a relevant letterhead. Cheques or P.O.s made out "Rimmer Bros Ltd" please.

Note, if you are unsure as to the exact amount to send, you can write across the top of your cheque, "Cheque Value Not To Exceed £...". You can post us your credit card details if you prefer. If you send cash, note that we cannot accept responsibility for any loss, so registered mail is essential. Bank drafts and Building Society cheques are also accepted. For Bank Transfer information see Price Guide.

ORDERING BY FAX

UK CUSTOMERS: 01522 567600 OVERSEAS CUSTOMERS: +44 1522 567600

See also "Overseas Orders & Payment."

Another facility for customers who wish to make enquiries, or order by credit, debit or charge card. Again, we will need your name, address (inc. postcode), credit card details and delivery address (if different). Plus fullest possible car/parts details - as for orders by post.

ORDERING BY E-MAIL AND THE INTERNET

For Internet surfers our web site holds details on all our parts catalogues and has an on line ordering facility. Use our E-Mail address for sending your order or parts enquiry. State if you require us to confirm prices, as they can sometimes alter at short notice.

www.rimmerbros.co.uk

E-Mail: sales@rimmerbros.co.uk

ORDER

COLLECTING IN PERSON

If you wish to 'call and collect', you will always be made welcome at our shop and sales counter during business hours. Our Visitor Information Centre has lots of interesting details of each production model and the factories where they were produced.

Customers drive here regularly from all over Europe. Lincoln is a historic Cathedral city and is an excellent place to visit. We're about 2 miles south of Lincoln on the A15 Lincoln to Sleaford road (see map on back cover). We advise you to pre-check by phone that we have the part/s you want in stock.

We accept payment by credit card, cash, bank draft, travellers cheque, building society cheque, and personal cheque (when presented with a cheque card) even if the cheque card limit is exceeded, and by business cheque with accompanying letterhead.

PRICING

For full information and details on prices, VAT, & VAT exempt export sales, please refer to the latest Price Guide. Written quotations are available on request, for parts and/or delivery charges. Please confirm all prices when ordering - prices and availability can sometimes change at short notice. Up to date prices can be found on our web site.

OVERSEAS ORDERS & PAYMENT

We supply parts to classic car owners Worldwide. We have thousands of customers in Europe and regularly send parts as far afield as Australia, North America, Africa and the Far East. Delivery costs of course, vary greatly (depending on size/weight/urgency). We can quote accurately for the cost of parts and delivery once your requirements are known.

Our Multi-language European Order Forms explain how to order parts in English, Italian, German, Spanish and French.

WE EXPORT TO THE

EC & WORLDWIDE

TEL: **+44 1522 568000**
FAX: **+44 1522 567600**

Payment By Export Customers:

There is a choice of payment methods for customers overseas;

- A) Credit card, Debit card or Charge card.
- B) Bank cheque - in ££s sterling (Drawn on a London Bank)
- C) Travellers Cheques (signed) - in ££s sterling.
- D) Giro Cheques in ££s sterling.
- E) By Bank Transfer - see Price Guide.

PLEASE NOTE THAT ALL TRANSACTIONS MUST BE IN ££s STERLING.

CHOICE OF DELIVERY METHODS

(For Further Information/Cost Details, Please Refer to Price Guide)

UNITED KINGDOM

There are numerous delivery options for the UK mainland ranging from Post (first class or parcel post) to overnight carrier services. We can advise of the best method of despatch when you telephone. The type of service that we recommend depends upon the size, weight and urgency of the parts you require.

Our price guide indicates the approximate costs, and we will confirm the final invoice total at the end of the call if required.

WORLDWIDE (NON EC COUNTRIES)

We started exporting parts Worldwide in 1982, and since then we have gained an excellent reputation for our speed & efficiency of service.

Delivery costs are based on size, weight, and method of delivery. We have discounted rates with well known carriers, so costs are kept to a minimum. Send us a list of the parts you need (using post, phone, fax or E-Mail), tell us quantities and urgency, and we will work out the best delivery method and quickly advise you of the cost.

Written quotations are available on request.

EC COUNTRIES

The European Community Single Market permits the free movement of goods between all EC countries. This allows us to provide a superb service to all our customers within the EC, with the benefits of improved delivery - via lower charges and easier documentation. Deliveries can be easily arranged using air or surface transport. Our Price Guide indicates approximate costs.

NEW & RECONDITIONED PARTS

Almost every part we list is sold brand-new, but in many instances we also offer you the facility to buy "Reconditioned" (usually giving us your old component in part-exchange).

Where there is a reconditioned version of a part, you will find the letter 'R' added at the end of the part number.

EXCHANGE SURCHARGES (REFUNDABLE)

Where parts are sold on an exchange basis, an "Exchange Surcharge" is applied - a deposit in effect, which is refunded to you when your old unit is received by us. This system allows you to make an exchange without having to send the old unit first ... it can often prevent your vehicle being off the road. The amount of the Exchange Surcharge is shown in the Price Guide in italics below the part number.

Before returning your old unit, please telephone our customer service dept on 01522 568000 in order to obtain a return authorisation number. See reverse of invoice for full details of return procedure. Units must be drained of oil, water and be serviceable; we reserve the right to retain all or part of the surcharge if the unit is irreparable, damaged or not identical to the type supplied.

SELECTED USED PARTS

We are often asked for parts that are no longer available, where the cost of re-tooling or re-manufacturing is prohibitive, and there is little or no chance of the part becoming available. We have also found that some customers prefer the option of being able to buy a (non safety critical) used alternative, where perhaps the cost of a new part is unjustified.

Over the years, we have acquired many parts which are suitable for re-sale. You will find these parts listed in the Price Guide under the same part number reference as new but with a 'U' suffix. All used parts have been cleaned and inspected and are sold as serviceable when fitted.

"Errors & Omissions Excepted. All parts offered subject to availability. All part numbers, illustrations and photographs used in this catalogue are intended for reference/identification purposes only, and are not necessarily an exact representation of the goods supplied. Whilst we make every effort to ensure the accuracy of product descriptions in this catalogue, they are based upon information supplied by the manufacturer/distributor at the time of publication. There may be occasions - due to circumstances beyond our control - when specifications are changed, or when goods become temporarily unavailable." Certain part numbers have been superseded to an alternative number when a later version or updated specification is offered.

High-quality saloons

Although the original Triumph Dolomites were produced in the 1930s, there was really no connection between old and new varieties. It was only their name that was transferred to the multi-faceted saloons of the 1970s. In character, though, the two generations were similar - for both breeds of Dolomite were better-trimmed and better-equipped than other family cars of the period.

Although the first of the modern Dolomites - the Dolomite 1850 - was not introduced until 1972, it was itself a lineal development of an earlier front-wheel-drive Triumph first seen in 1965.

Confused? So were many contemporary Triumph enthusiasts, at the time. This, therefore, might be a complicated story, but to make the entire Dolomite range more understandable (and to embrace some transitional machines) we need to spell out how it evolved. After this, we hope you will realise the challenge we have had in providing parts stock for all these cars.

Back in 1965, Triumph introduced the Michelotti-styled 1300 saloon, a four-door car with an in-line 1,296cc Herald-type engine and special front-wheel-drive gearbox, which rode on a 96.6 inch wheelbase. In some ways the style was like that of the larger 2000 saloon. A more powerful 1300TC (TC = Twin Carb, not twin-cam) was soon added to that range. This car, like all its descendants which would follow, was assembled at Canley, Coventry.

In 1970 the original car was up-graded with a 1,493cc engine to become the 1500, this being the first car in this family to have the revised interior and four-headlamp nose which became styling 'signatures' of the Dolomite family which would follow. Although the main underpan/platform and engineering had not been changed, the latest car was seven inches longer, overall.

Rear-wheel-drive with a new platform

At that point Triumph engineers thoroughly reworked the body shell with a different floorpan/platform so that rear wheel drive, a conventional gearbox/prop shaft and a live rear axle layout could be all be accommodated within the same wheelbase. That wasn't the only change - they also developed a two-door version of the shell, and a short-tail variety. By any standards this was a very versatile range, and all manner of derivatives were possible.

The first Triumph to use this rear-drive layout was badged as the Toledo 1300 of 1970, which combined the 1300's engine with two-doors and the abbreviated tail, for space reasons this meaning that the under-boot mounted fuel tank had to be a lot smaller than that of the other models. It was easy to 'spot' this car for it had rectangular headlamps and very little decoration. Complications then set in, for the Toledo soon picked up a 1,493cc engine for some export markets, and a four-door version followed.

The Toledo is important to this story, not only because it was the first of the rear-wheel-drive variety, but because it had a very familiar 1,296cc engine and all-synchromesh four-speed gearbox, it was the direct ancestor of the Dolomite 1300.

Three years later (we are taking this development slightly out of turn, to make the overall story simpler), the front-wheel-drive 1500 was dropped in favour of the rear-wheel-drive 1500TC. Like its predecessor, this was a four-headlamp 'long-tail' car.

Visually, in fact, there was almost no way of telling the difference between the two cars as they shared the same exterior styling. Under the skin, however, the 64bhp/1,493cc engine drove through the same gearbox as the Toledo: this engine would be uprated to 71bhp in 1975. Called the 1500TC, it was the direct ancestor of what became the Dolomite 1500.

The first Dolomite-badged car, the Dolomite 1850, appeared in January 1972 (its launch having being delayed by serious industrial disputes within British Leyland). Although there was a new engine, this car was actually closely related to the 1500TC and to the Toledo.

The 1850, therefore, was built around the four-headlamp/long-tail version of the rear-drive platform, still running on its trade-mark 96.6in. wheelbase, and still obviously evolved from the original Michelotti style. This, though, was the first Triumph car to use the new-generation single-overhead-camshaft engine which was being developed for use in other Triumphs, including the TR7 sports car (in 2 litre form). This was an engine which Triumph had already been supplying to Saab (of Sweden) since 1968, first in 1,709cc form, and later as an 1,854cc unit. The cylinder head layout and other design features were also shared with the Stag V8 engine.

For the Dolomite this engine was to be used in 91bhp/1,854cc form, complete with twin SU carburettors, which was enough to guarantee a top speed of more than 100mph. Matched by the same all-synchromesh four-speed gearbox as cars like the Toledo 1500 and the (later) 1500TC, a Laycock overdrive was also optional, as was a three-speed Borg Warner automatic.

The 1850 also had a sumptuously-equipped interior, with a new style of wooden facia, a full display of instruments, and an alloy-spoked steering wheel, plus squashily-comfortable seats and high-quality trim and carpets. It looked like, and felt, a real driver's car, a compact sports saloon. When it was new, in 1972, the Dolomite 1850 cost £1,399, had a top speed of at least 100mph, and could sprint to 60mph in less than 12 seconds. It was no wonder that Autocar's road testers called it 'Very desirable'.

The most excitingly-specified Dolomite of all, however, was yet to come. In the summer of 1973, Triumph unveiled the Dolomite Sprint, which was not only a better, faster and more capable car than the 1850, which continued, but it was the first series-production British car to use a 16-valve cylinder head. 16-valve heads had appeared in other makes of car, but at the time they were limited-production 'racers' - this, on the other hand, was a well-developed, flexible and refined series production machine.

This powerful 1,998cc engine was matched to the brawny Triumph Stag-style gearbox, optional overdrive or automatic transmission, and a larger (TR6-type) final drive, all of which made it very robust machine with reliability to match its performance.

Like the 1850, the Sprint was only sold as a four-door saloon. Visually, the only way to pick the Sprint from the 1850 was that the Sprint had a unique type of smart cast alloy road wheels and a vinyl roof covering. That, of course, and the way that it inevitably drew away from almost every other car on the road, for the 16-valve/single-cam 1,998cc engine produced 127bhp, which was good for a top speed of at least 115mph, and 0-60mph acceleration in less than nine seconds.

Because 175/70-HR-13in. tyres on 5.5in. rims were standard, and the suspension was stiffer than that of the 1850, the Sprint handled like a true sports saloon, and since it was even better equipped and furnished than the 1850, originally costing only £1,740 it always sold very well.

By the end of 1973, therefore, Triumph had an integrated range of compact rear-drive cars in its range, though these had a rather confusing choice of titles - Toledo, 1500TC, Dolomite 1850, and Dolomite Sprint. They were offered in a wide range of prices and performance - to contrast, a Toledo was only good for about 83mph, but was good for perhaps 35mpg, while the Sprint would do 115mph, but only 23mpg, which proved, as ever, that in motor car engineering you could not get anything for nothing.

Rationalisation from 1976

Finally, in March 1976, Triumph rationalised this range of four cars, turning it into five models, making few mechanical changes, but using the Dolomite name throughout. This, together with the original 1976 prices, is how the new basically compared with the old:

<i>New model</i>	<i>Basic origins</i>
Dolomite 1300 (£2,070)	- a renamed/improved Toledo 1300 four-door
Dolomite 1500 (£2,205)	- an improved 1300 with Dolomite 1500 running gear
Dolomite 1500HL (£2,441)	- a premium-specification Dolomite 1500
Dolomite 1850HL (£2,723)	- an improved Dolomite 1850
Dolomite Sprint (£3,283)	- as before.

There was more, much more, to this reshuffle than a choice of homogenous names, and for the usual product-planning reasons, standardisation did not go too far! All cars, however, were now to be equipped with laminated windscreen glass, seat headrests and improved steering column switchgear.

The Dolomite 1300 kept its rectangular headlamp Toledo-type nose, but inherited the longer tail of the other types, while it was also equipped with Dolomite 1850-style suspension, wider wheels, a larger (12.5 Imp. galls) fuel tank, a new facia, better carpets and an electrically-heated rear window. As the entry-level car to this range, it had vinyl upholstery, and plain glass in the windows. In some ways, therefore, it carried more improvements than any of the other types.

The Dolomite 1500 was a new half-and-half model, for it shared the same rectangular-headlamp nose as the Dolomite 1300, and also got Dolomite 1850-type suspension, but had the larger 71bhp/1,493cc engine (which was based on that of the current Spitfire), overdrive as optional equipment, brushed nylon cord upholstery, all to a rather simpler equipment standard than the 1500HL.

The Dolomite 1500HL model (HL = High Line....), was really a direct replacement for the 1500TC, with the same four-headlamp nose/long-tail body and the 71bhp/1,493cc engine. However, it also inherited the completely-equipped Dolomite 1850-style facia and full array of instruments, plus the same car's oddments tray which surrounded the gearlever. Overdrive and automatic transmission were both optional extras.

The latest Dolomite 1850HL was an improved version of the original 1850, still with its 91bhp 'slant-four' overhead-camshaft engine, still with the same excellent layout of instruments, controls and seating (all shared with the 1500HL), with the same type of road wheels, but from this point also with Sundym window glass.

The Dolomite Sprint continued almost unchanged as the flag ship of the range, most powerful, fastest and heaviest of all types. As before, tinted glass was standard. Once established, this range of five Dolomites changed little in the next four years though (because of the inflationary atmosphere of the period) prices rose rapidly. because there were so few visual changes, the Dolomites gradually slipped out of fashion, sales gradually tailed away, and the last cars of all were built at Canley in the autumn of 1980.

These, along with the Spitfire 1500s, were the last Triumphs of all to be built at the historic site in the city.

Dolomite family production figures : 1965 - 1980

The following is a complete set of figures for all rear-wheel-drive and front-wheel-drive saloons produced in this model family. Our thanks, as ever, to BMIHT for their help:

Model	Production	When built ?
Front-wheel-drive types:		
1300	113,008	1965 - 1970
1300TC	35,342	1965 - 1970
1500	66,353	1970 - 1973
Rear-wheel-drive types:		
Toledo 1300	113,294	1970 - 1976
Toledo 1500	5,888	1970 - 1976
1500TC	25,549	1973 - 1976
Dolomite 1300	32,031	1976 - 1980
Dolomite 1500	43,235	1976 - 1980
Dolomite 1850	79,010	1972 - 1980
Dolomite Sprint	22,941	1973 - 1980

RECONDITIONED FULL ENGINE SPECIFICATION SPRINT - 1850 - 1500 - 1300

All our Reconditioned 'Full Engines' have a high rebuild specification and are suitable for unleaded fuel.

SPECIFICATION

- Crankshaft Re-ground
- New Main Bearings
- New Thrust Washers
- Cylinder Block Re-bored
- New Pistons & Rings
- New Big end Bearings
- Camshaft Re-profiled
- New Cam Followers
- New Cam Chain, Tensioner & Guides
- New Inlet Valves ■
- New Exhaust Valves ■
- New Valve Springs
- New Valve Guides
- New Oil Seals
- New Oil Pump & Switch
- Sump & Timing Cover Fitted
- New Rocker Shaft ■▲
- New Rocker Arms ■▲

■ NOT APPLICABLE TO SPRINT . ▲ NOT APPLICABLE TO 1850

BENCH TESTING

Apart from having a multitude of new parts & components fitted - and with a 12 Month/12,000 Mile Warranty - our engine units are run on a test bed after assembly. During the test-run period (at varying engine speeds), all external joints and seals are checked, and the water temperature and oil pressure are monitored to verify correct operation. After the bench test, the engines undergo a final inspection and are prepared for sale.

NOTE: All units are drained of oil & water before despatch.

Our Full Engines are assembled ready to accept manifolds, water pump and other ancillaries. Additional installation information and running-in details are supplied with every unit. We can also supply a 'Full Engine Build-Up Kit' that includes all necessary gaskets/oil filter etc, enabling you to install the full engine in your vehicle. Alternatively, fitting can be arranged locally in Lincoln if required, please enquire for details & costs.

Please Note; if you are comparing prices may we suggest that specifications are also compared.

RECONDITIONED SHORT ENGINE SPECIFICATION SPRINT - 1850 - 1500 - 1300

All our Reconditioned 'Short Engines' are built to the following specification;

- Crankshaft Re-ground
- New Main Bearings
- New Big end Bearings
- New Thrust Washers
- Cylinder Block Re-bored
- New Pistons & Rings
- New Oil Pump Supplied

Please note; The jackshaft (Sprint/1850) or Camshaft (1500/1300) is not supplied with a short engine. Additional installation information & running-in details are supplied with every unit. Don't forget that we supply all the necessary gasket sets/components etc, required to build-up a short engine.

'NEW' SPRINT Full Engines

Over the years we have been constantly 'buying-up' large stocks of Brand New Blocks and Cylinder Heads from Factory sources (these supplies are now almost exhausted). So, for the discerning owner who would prefer a New Sprint Full Engine to reconditioned, you now have the choice. These Full Engines are actually built-up using a New Short Engine & Cylinder Head shell, with new components used throughout* (exceptions may include the sump pan and timing cover, when serviceable reconditioned units may be fitted). Full Engines are assembled ready to accept manifolds, water pump & other ancillaries. Additional installation information and running-in details are supplied with every unit. We can also supply a 'Full Engine Build-Up Kit' that includes all necessary gaskets/oil filter etc, enabling you to install the full engine in your vehicle. Alternatively, fitting can be arranged locally in Lincoln if required, please enquire for details & costs.

Bench Testing - New Full Engines

Bench testing can also be carried out on new engines at an additional cost, please enquire for details.

'NEW' SPRINT & 1850 Short Engines

New*Short engines are supplied less the oil pump and jackshaft. The warranty on new engines is that of our reconditioned units - please refer to the 'Warranties' section in our price guide.

*A reground 10/10 Crank is used for new Sprint Full and Sprint & 1850 Short Engines. These units are normally built to order.

Full Engine Build-up

When building up a Full Engine to a complete assembly, check the condition of your old water pump, if unsure, replace or overhaul with a reconditioning kit.

The condition of the radiator is crucial to ensure proper and efficient cooling - either replace or have tested professionally (see Warranties), as are all the hoses and thermostat, we strongly recommend these are examined carefully, or replaced as a matter of course. Engine mountings, clutch etc, should also be inspected and renewed where necessary.

Ensure correct strength anti-freeze is used in the cooling system. Carburettors should be in good working order with mixture & balance set correctly.

Please familiarise yourself with the running-in and head re-torquing instructions on the card supplied with every engine unit. If this card has become separated from the engine when you take delivery, please contact us.

Short Engine Build-up

When building up a short engine to a complete assembly, check the condition of timing chain, guides, tensioner, sprockets, water pump (replace or overhaul with reconditioning kit), jackshaft or camshaft, cylinder head face (for flatness), valves, guides, cam followers, camshaft etc, and replace where necessary.

We supply all these components separately if required along with gasket sets, oil seals, spigot bush, oil filter etc.

The condition of the radiator is crucial to ensure proper and efficient cooling - either replace or have tested professionally (see Warranties), as are all the hoses and thermostat, we strongly recommend these are examined carefully, or replaced as a matter of course.

Ensure correct strength anti-freeze is used in the cooling system. Carburettors should be in good working order with mixture and balance set correctly.

-------------	----------	----------

Cylinder Head & Fittings

CYLINDER HEAD SPECIFICATION

Reconditioned Cylinder Heads - Sprint/1850

Reconditioned cylinder heads are supplied 'shimmed up' ready to fit, and include re-profiled cam, rocker shaft/arms (sprint only), new valves (Sprint valves renewed where necessary), new guides, valve springs & camshaft followers. Suitable for unleaded fuel.

New Cylinder Heads - Sprint

These are brand new (boxed) factory cylinder head assemblies, complete with camshaft, rocker gear, valves etc, and are ready to fit. (Limited stocks).

Reconditioned Cylinder Heads - 1500/1300

Reconditioned cylinder heads are supplied fitted with new valves, guides & springs. Less rocker shaft assembly. Suitable for unleaded fuel.

WATER PUMPS & REMOVAL TOOLS

IDENTIFICATION

WATER PUMPS SPRINT/1850

If unsure as to the type of pump fitted to your vehicle, the pump cover will have to be removed to check the number of vanes on the impellor. (Note: pumps & covers cannot be interchanged between 6 & 12 vane types, a 12 vane pump must be fitted with a 12 vane cover).

A slide hammer (part no RB7009), is usually required to extract the pump from the cylinder block (or improvise) - Note Left Hand thread on bolt. If the pump is difficult to remove, it may leave the brass cage in the cylinder block, this may be prised out carefully. It is also worth checking the condition of the pump spindle bush (part no 145022), located in the cylinder block, and replace if necessary.

CARBURETTORS

Note - It is quite straightforward to overhaul your existing carburettors using the service items listed - with the help of a workshop manual.

With the tightening of the MOT regulations regarding 'Exhaust Emissions', it is therefore even more important that your carb's are maintained in good order!

We can recondition your existing SU carburettor(s), or can often supply reconditioned carbs to special order (prices on application). The listings here, however, are primarily for identification purposes, they will also show if you have the correct carb(s) fitted. To check, the carb(s) can be positively identified by a silver tag which is located on the float chamber and is marked with the part number, eg, AUD661F. Having identified your carb(s), all you need do is then refer to the corresponding carburettor components.

The reference numbers quoted in the following listings against the model type, are Engine numbers not Chassis numbers.

CARBURETTOR OVERHAUL KITS

If your Carburettors are simply 'tired', our kits contain the parts you need to carry out a basic overhaul, at minimum cost. They include: gaskets, needles, main jets and needle float valve kits.

CAR SHOWN FITTED WITH SPORTS EXHAUST SYSTEM.

EXHAUST SYSTEMS

MILD STEEL & STAINLESS STEEL

Mild Steel Exhausts for the Dolomite are becoming harder to locate now that most major manufacturers have dropped them from their range. We can however, offer Stainless Steel alternatives (at a relatively small additional cost) where mild steel is unavailable. Please refer to our price guide for latest information.

Full system part numbers have either a 'MS' (Mild Steel) or 'SS' (Stainless Steel) suffix. Individual component part numbers have no suffix for Mild Steel and 'SS' suffix for Stainless Steel.

STANDARD EXHAUST

Refer to Price Guide for current availability using the 'System' or 'Component' part numbers listed below for both Mild Steel (MS) and Stainless Steel (SS).

Fitting Kits include gaskets, clamps, rubbers, exhaust hanger hooks, jointing compound. Exclude brackets.

Manual Gearbox

Sprint Gearbox

Either 4 Speed Non Overdrive or 4 Speed with J'Type Overdrive.

1850 Gearbox

From 1972-74 - 3 Rail Type with or without J'Type Overdrive.

1850 Gearbox

From 1974/5 Onwards - Single Rail Type with or without J' Type Overdrive.

1500/1300 Gearbox

1976 Onwards - Single Rail Type (1500 O/D Option only).

GEARBOX UNIT - RECON. (NON O/D TYPE)

Ready to accept Ancillaries. See also Gearbox, Gaskets & Seals.

Sprint	(1)	RT1157R
1850 (3 Rail) (Early)	(1)	RG1012R
1850 (Single Rail) (Late)	(1)	RT1103R
1500/1300 (Early Type)	(1)	RL1020R
NB - Scroll Seal Type Bellhousing/Input Shaft.		
1500/1300 (Late Type)	(1)	RL1054R
NB - Rubber Oil Seal Type Bellhousing/Input Shaft.		

GEARBOX UNIT- RECON J'TYPE O/D (LESS O/D)

Ready to accept Ancillaries. See also Gearbox Gaskets & Seals.

Sprint	(1)	RT1047R
1850 (3 Rail) (Early)	(1)	RT1170R
1850 (Single Rail) (Late)	(1)	RT1117R
1500 (Early Type)	(1)	RL1216R
NB - Scroll Seal Type Bellhousing/Input Shaft.		
1500 (Late Type)	(1)	RL1338R
NB - Rubber Oil Seal Type Bellhousing/Input Shaft.		

*Note: Ensure Overdrive is cleaned internally to avoid cross-contamination of dirty oil prior to fitting to Gearbox.

GEARBOX UNIT - RECON INC O/D

Assembled with Overdrive less Solenoid and Ancillaries.

See also Gearbox Gaskets & Seals.

Sprint	(1)	RT1071R
1850 (3 Rail) (Early)	(1)	RT1106R
1850 (Single Rail) (Late)	(1)	RT1151R

GEARBOX (MANUAL) COMPONENTS

We have listed here a selection of major gearbox components.
We also stock a comprehensive range of parts which are too numerous to list here.
If the part(s) you want are not listed, please telephone or fax with your requirements
and we will consult factory parts listings and quote accordingly.

Starter Motor Immobiliser

Dis-Car-Nect Immobiliser	(1)	RX1356
Replacement Screw Knob	(1)	RX1356Knob
Replacement Fuse	(1)	RX1356Fuse

HOW DOES 'DIS-CAR-NECT' WORK?

When leaving your car, simply remove the knob to isolate the starter circuit. The 16 amp by-pass fuse will maintain current to all other electrical circuits (central locking, stereo memories, alarm etc). Because the starter motor draws over 150 amp's, any attempt to connect (hot wire) the starter motor will instantly cause the fuse to blow. This immobilises the car until the knob is replaced. If this should happen, simply replace the 16 amp fuse at a convenient time.

As an added advantage, the 'Dis-Car-Nect' will also prevent battery drain if you intend to store your car, simply unscrew the knob and remove the fuse. For extra security, unscrew and remove the immobiliser knob completely. Fits all vehicles and is easily fitted to any battery terminal. Full installation instructions supplied with every unit.

TOLEDO

TRIUMPH 1500/1300 FWD/RWD/TC

Many parts for these models are interchangeable with the Dolomite and therefore, availability is very good. However, if you have any specific parts enquiries please contact our Sales Office, who will be happy to consult Factory Parts Listings and advise if the part(s) you require are still available.

We have compiled a list of parts that we currently carry in stock that specifically fit the Toledo, 1500/1300 FWD/RWD/TC. Generally we have good stocks of all the items listed, most of which are now unavailable through the Rover network - so it's first come first served! We also have in stock many other parts where the quantity we hold is small, so we have not listed them here - it's always worth a call!

ROCKER FEED KIT - 1500/1300

ROCKER OIL FEED KIT

Excessive rocker shaft wear is a classic complaint about the Triumph push rod engines. The external rocker feed kit is an effective and easy to fit solution to the problem. It works by piping oil from a plug hole in the cylinder block main oil gallery up to the cylinder head, thereby maintaining a higher oil flow than standard. No drilling or tapping is required for installation. The kit is so good, it looks as though it should always have been there!

EXTERNAL ROCKER FEED KIT

1500/1300

RR1340

The Rocker Feed Kit and Oil Consumption

When the supplementary oil feed to the rocker gear is fitted, an increase in oil consumption is often encountered. This is attributed to oil being drawn down worn valve guides. The extra amount of lubricating oil flowing through the valve and rocker chamber, as supplied by the feed kit, exaggerates any tendency for oil to be sucked down worn valve guides past worn valve stems. The best solution is to fit new valves and guides, but this is not always on the top of the repair priority list. To assist in the reduction of oil being sucked down the guides a method of valve stem oil seal is required. We offer the simple do-nut rubber ring that is used so successfully on MG sports cars. Its part number is AEK113, one per valve stem.

Now the clever bit... How to fit them without removing the cylinder head from the car?

Each seal needs to be fitted to the valve stem above the valve guide but below the valve spring upper retaining cap(s). Remove the rocker cover, rocker gear and the spark plugs. Cover the holes that the push rods come up through so nothing can be dropped down into the engine. Turn the crankshaft so that number one piston is at bottom dead centre (BDC). Feed a length of clean, pliable rope down the spark plug hole of number one cylinder, leaving a bit hanging out so you can retrieve it. Now, slowly and carefully turn the crankshaft clockwise by hand, a resistance will be felt as the rising piston in that bore compresses the rope against the combustion faces of the two valves in that cylinder, holding them against their seats. The valve collets and spring caps of that cylinder can now be removed without the fear of losing the valves down the bore. The valve stem oil seals can be fitted to these two valve stems and perhaps a new set of valve springs.

Be honest, this tip has saved the cost of a decoke set! Once the valve stem oil seals and other parts have been refitted to this first pair of valves satisfactorily, simply turn the crank anticlockwise to BDC, withdraw the rope and repeat the process on the remaining cylinders and pairs of valves.

To be sure that the rope has compressed sufficiently against the faces of the valves, attempt to push the valves by hand, as if being acted on by the rockers before removing the spring caps or collets, this is the fail safe check. This method can be adopted anywhere as it does not require the use of compressed air, special tools or luck.

COMPETITION TYPE HARNESS

A popular alternative to standard seat belts - these really do look the part!

The 4-point harness shown (no. 1) can be converted to the 6-point type by the inclusion of the crotch strap listed (no. 2). Note that fittings (eye bolts, reinforcement plates & bolts/spacer sets) are supplied separately. Harnesses are supplied singularly in 2" wide red webbing (black or blue webbing supplied to special order). This harness is designed for road use - please contact us if you have specific FIA/RAC approved type requirements.

CAR STORAGE

CAR-CAPSULE

The dry solution for car storage problems.

Car-Capsule practically eliminates the problems of dust, dirt, scratched paintwork & moisture retention, which can lead to corrosion problems.

Quick and very easy to use, Car-Capsule is suitable for both long and short term storage.

The energy efficient (low-voltage) fan maintains a continuous flow of filtered air passing over and through the stored vehicle.

Car-Capsule helps prevent interiors from becoming damp & musty during storage.

Dolomite Car-Capsule (480x180cm) RX1402

Also available in 420x160cm (RX1401) & 540x200cm (RX1404) sizes.

OUTDOOR 'MONSOON' SEMI-TAILORED CAR COVERS

Our range of semi-tailored outdoor car covers offer total protection with a range of sizes to suit all applications.

TRIUMPH VIDEOS

Produced by The British Motor Industry Heritage Trust (BMIHT), these videos are compiled from archive footage from the past and remind us of how things used to be! Very entertaining.

THE TRIUMPH MARQUE

RX1436

This video shows the STANDARD-TRIUMPH film unit at its best, following the fortunes of rally and race teams, it covers the major successes of the Standards, TR's and Spitfires from 1953 to 1968 and the introduction of the TR5. Footage of the 25th Monte Carlo Rally is also included.

TRIUMPH HERALD

RX1437

This video includes the launch of the Triumph Herald in the Albert Hall, the gruelling test journey across Africa and footage of the Canley production factory. Raymond Baxter adds the informative commentary.

LEYLAND CARS OF THE 70's

RX1442

A celebration of those wonderful films made to launch some famous cars of the golden years at British Leyland. Includes footage of the Maxi, Marina, Allergo and Princess. (62 minutes in total).

HAYNES OWNERS WORKSHOP MANUAL - MAN

All models, shapes, sizes & colours, 120,000BC to present day. By Dr Ian Banks. 128 pages.

The practical step-by-step guide to men's health. Not a motoring manual, but a health manual presented in the style

of a Haynes car repair guide! Covers basic health advice and 'trouble-shooting' with text and illustrations. Men are far more likely to look after their cars than their own bodies! Reading this could mean the difference between a healthy, high mileage life and premature breakdown.

'Man' Haynes Manual

VEHICLE SECURITY

'Dis-Car-Nect' starter immobiliser **RX1356**
 Replacement screw knob **RX1356K**
 Replacement fuse **RX1356F**

HOW DOES 'DIS-CAR-NECT' WORK?

When leaving your car, simply remove the knob to isolate the starter circuit. The 16 amp by-pass fuse will maintain current to all other electrical circuits (stereo memories, vehicle alarm etc).

Because the starter motor draws over 150 amps, any attempt to connect (hot wire) the starter motor will instantly cause the fuse to blow, immobilising the car until the knob is replaced. If this should happen, simply replace the 16 amp fuse at a convenient time.

For extra security, unscrew and remove the immobiliser knob completely, and if you intend to store your vehicle for some time, 'Dis-Car-Nect' will also prevent battery drain, simply unscrew the knob and remove the fuse.

Fits all vehicles and is easily fitted to any battery terminal.

Full installation/user instructions supplied with every unit.

UNLEADED FUEL ADDITIVES

Bottled additives are available which can be mixed with either 'Premium' or 'Super' unleaded depending upon application. It usually works out cheaper to use bottled additives than leaded or LRP - work it out for yourself!

Castrol Valvemaster
250ml

RX1407VM

Castrol Valvemaster Plus
250ml

RX1407VMP

Endorsed by the federation of British Historic Vehicle Clubs (FBHVC), having been independently tested and approved, both products offer a high level of protection against valve seat recession under all driving conditions. In addition, castrol valvemaster plus provides an octane boost to premium unleaded petrol which reduces pinking or knocking on high compression or performance applications. This also usually avoids the need to re-tune your engine. Treats 250 litres of petrol.

'CONCOURS' SPECIALIST WHEEL CLEANER

The 'Conco's' specialist wheel cleaning system will help you care for your Classic's wheels.

Suitable for all Steel, Alloy and Wire wheels (including painted & chromed), 'Conco's' wheel cleaning system uses a unique 2-stage process that not only cleans, but gives wheels a superb lasting finish that helps to protect them, making them easier to care for and clean in the future.

'Conco's' Wheel Cleaning Kit - RX1405

Kit includes;

- Special cleaning solution (580ml).
- Wooden handled cleaning brush & dispenser.
- Finishing/protection solution (180ml)
- 2 pair of disposable gloves.

Cleaning solution breaks down brake dust & road grime. Brush & dispenser gets into all those awkward places.

Finishing/protection solution leaves wheels like new.
